WESTMINISTER
Technologies Ltd

Safety Health & Environment

Quality and health of personnel, working on job sites, as well as environmental protection are Westminister's top priorities in local communities. At every stage of project execution,

these concerns are taken into consideration and are an integral part of our operations.

Westminister's cooperates with governments, clients, authorities and professional bodies to promote workable standards and codes of practice and legislation in relation to Health, Safety and Environmental issues.

Based on this, we have a reliable HSE management system in place and this provides several protection thresholds that prevent accidents from happening.

Westminister is committed to:

- Minimizing the environment impact of its activities.

- Optimizing process safety risk analysis and systems

- Eliminating Short and long term health threats.

- Striving for a "zero accident" workplace

We believe in continuous improvement and sustainable development in our efforts to meet the needs of the present without compromising the ability of future generations to meet their own needs. HSE Management considerations are integrated in all our activities and decision processes.
